

HOME DEPOT AND FIRE CODES (continued)

the entire perimeter of the building. They also cite large trailers of merchandise left in the parking lots. I'm sure this problem applies to all such big-box stores as Lowe's and Wal-Mart Super Centers. The store manager needs to come up with an emergency fire lane plan that can be reviewed and approved by the fire official.

U. L. CODE DATABASE

CODE CORRELATION DATABASE - The UL Code Correlation Database identifies the correlation between particular model code section numbers and UL Product Category Codes. The database also provides hyperlinks to the UL Guide Information and other specific information. The database is simple to use, and accommodates two distinct searches:

- Identifying UL Product Category Guide Information that corresponds to a particular code section.
- Identifying code sections that correspond to a particular Product Category.

WHETHER YOU WISH to locate Guide Information that provides detailed information on a particular product category, or a comprehensive list of manufacturers of the certified products, this information is readily available at the click of a mouse. Just go to [:www.ul.com/regulators/codelinks](http://www.ul.com/regulators/codelinks)

OMEGA SPRINKLER RECALL DEADLINE

[1-800-871-3492](tel:1-800-871-3492).

AUGUST 31, 2007 IS the deadline for filing a claim with Central Sprinkler Co. for defective fire sprinklers. The problem was with a defective O-ring that might not operate properly during an actual fire emergency. To contact their voluntary replacement program, call:

THIS MAY CONCERN YOU - - -

- **ALARMS: ANALOG VS. DIGITAL PROBLEM** - Some 135, 000 alarm systems (fire, police, medical) that are currently using analog signals for wireless communication will soon become obsolete and unusable. By February 18, 2008, most wireless providers will no longer use the analog systems and will go completely digital. This means that some alarm systems, if not updated, may not function after that date. The No. 1 alarm co., ADT, is switching gear, but they claim the digital gear wasn't available until several months ago. Caution: Contact your alarm system company and verify that they have gone digital.
